

11041699

12-pin lead kit for VRFI - VANTONE (after 09/2005)

The "ALDES Control" pack makes it easier to control, test, and adjust ALDES fire dampers and smoke control dampers.

ALDES CONTROL» pack

PRODUCT BENEFITS

- portable, standalone function controller,
- ideal to test a damper independently of the FACP,
- simple to use.

Principles of operation

The "ALDES Control" pack is used to test the operation of all mechanisms of a fire damper or a smoke control damper by simulating the phases of the central control system.

Product description

The "ALDES Control" pack is an automatic function controller. It serves to test the operation of all mechanisms of a fire damper or smoke control damper, such as the electromagnetic trip device, the position signal contacts and the reset motor. Furthermore, it can be used to acceptance-test equipment before connecting it to the central fire alarm control panel.

Fields of application

New, Refurbishment, Non-residential buildings

Installation

- uses a multi-pin connector to connected to the electrical terminal block of an ALDES fire damper or smoke control damper.

Main characteristics

- contents of pack:
 - controller,
 - protective bag,
 - 10-pin lead for ISONE, PLAFONE and VANTONE (after 10/2005),
 - electric charger.
- automatic voltage selection: 28 or 48 VDC,
- portable standalone device, battery charged via mains,
- available in branch stock,
- order lead 11044386 in addition for OPTONE dampers.
