AXONE key reset box - contact not maintained

Product description

The Fire service shutdown box is used to override the smoke and heat exhaust system in the event of a fire. As its name suggests, it is reserved for use by the fire service. This product is available for AXONE safety boxes and ALDES residential car park smoke and heat exhaust boxes. The reset box is used to shut down the smoke and heat exhaust system when the fire is put out. It switches the fan to "standby" mode or "comfort" mode. This device is compatible with the AXONE safety box and the SOS VELONE control box.

Fields of application

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

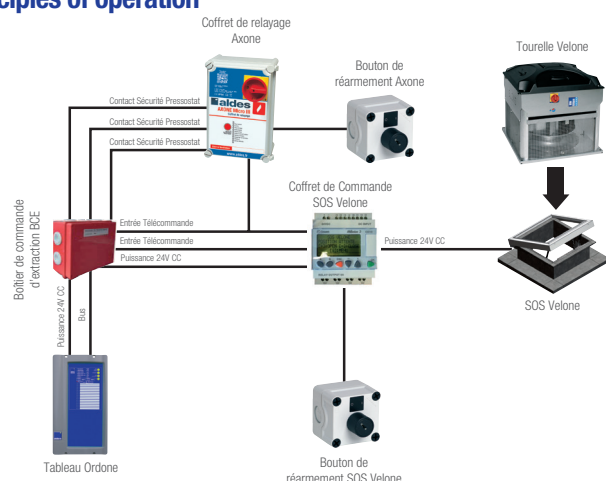

Installation

- fire service shutdown box must be installed near FACP,
- reset box must be installed in safety area corresponding to the safety device controlled.

Main characteristics

- Fire service shutdown box 2 maintained positions 0-1,
- reset box 2 non-maintained positions 0-1,
- access: requires key.

Principles of operation
