

Humidity-controlled air intake

11011755

Acoustic cover for EHL, EA and EHB2 - Aluminium

**Product description**

The acoustic cover for woodwork improves the acoustic performance of the associated air inlet.

Fields of application

Multi-occupancy residential housing, Individual residential housing, New, Refurbishment

Installation

- the woodwork acoustic cover is installed outside using 2 screws.

Reference arguments

- Positioned on the outdoor side of joinery, acoustic covers and hoods prevent water ingress via the air inlet, while ensuring its air management and improving its acoustic performance.

Main characteristics

- improves the acoustic performance of the air inlet by + 2 dB approx. for EHB² and EHL, and by +1 dB for EA and ELLIA.
