

CO2 sensor

11090793

BCA Mono single phase D250 4.5 kW + relay

## PRODUCT BENEFITS

- Pre-heats incoming air,
- Simple to install,
- Homogeneous heating along the whole section.

## Product description

This coil heats air for non-residential or industrial buildings. It is connected to the control system of HRV units.

## Fields of application

New, Refurbishment, Non-residential buildings

## Installation

- circular connection to standard ducts,
- requires a SAT BA kit for association with DFE, DFE TOP and DFE COMPACT controllers.

## Main characteristics

- galvanised steel ring with seals,
- stainless steel circuit AISI 321L,
- single-phase 230V or 3-phase 400V power supply,
- available with 1, 2, or 3 shielded circuits (1C, 2C or 3C),
- IP40 box,
- automatic and manual temperature limiter (60°C / 120°C up to Ø 250, beyond 79°C / 113°C).
