

Room-by-room heat recovery ventilation accessory

11021263

Backdraft damper 20/27

Product description

The backdraft damper prevents natural air draughts when the roof fan is stopped, to save on heating and/or air conditioning costs.

Fields of application

New, Refurbishment, Non-residential buildings

Installation

- backdraft damper can be installed with sealing frame, pivot shaft and flat roof base,
- not compatible with frame on duct (contact us).

Reference arguments

- The non-return damper passed the fire resistance tests.
- Installed in a few seconds thanks to its stacking plate.
- Easy removable and can be added later.
- Foresee an additional pressure loss of 50 Pa.

Main characteristics

- complies with CE marking,
- F400° -2h as per EN 12101-3,
- designed for installation in a few seconds using the stack plate,
- can be removed, easily added later,
- include a further pressure loss of 50 Pa.
