

Connector**11098055****CRE + seal - Ø 160 mm - 1-2/125**

The CRE sealed storey manifold is used to connect up to three 125 mm diameter ducts to the vertical riser while delivering class C airtight performance.

Storey collector connection with seals (CRE)

PRODUCT BENEFITS

- easy and quick to install,
- class C airtight performance,
- aesthetic ducting.

Product description

The CRE sealed storey manifold is used to connect up to three 125 mm diameter ducts to the vertical riser. It ensures leak-free installation without excessive pressure losses on the branch connection, as well as an airtight seal on the branch / flexible duct connection. The CRE sealed storey manifold is used with storey elements (2.47 m).

Fields of application

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

Installation

- to slot in or remove an accessory, rotate it slightly in the duct,
- as an airtight seal is automatically provided by the ALDES seal, no need to use sealant or adhesive tape,
- for vertical installations especially, the use of self-tapping screws remains recommended,
- time savings in relation to ducting with standard accessories is in the range of 20 % (at least 15 to 30 seconds saved per junction for diameters 125 to 315, or at least 30 to 60 seconds saved for each accessory in these diameters),
- ALDES sealed accessories are specially designed to ensure easy connection / disconnection. The ALDES range offers class C airtight performance and low connection torque.

Reference arguments

Application:

- Joins 1 or 2 connectors diameter 125 mm at 90° to vertical riser diameter 160 mm
- Ensures leak-free installation without excessive pressure loss at connections
- Ensures an airtight connection between duct connector and hose
- Complements storey elements (2.47 m)

Description:

- Sealed storey manifold diameter 160 mm with 2 sealed connectors at 90° diameter 125 mm galvanised steel

Main characteristics

- available in diameters from 125 to 400,
- galvanised steel as per EN 10346 ensuring uniformity of coating,
- 1 x Ø 160 connection version available for T.Flow® Hygro+ system,
- temperature range: - 30°C à + 100°C,
- resistant to ageing (• 30 years), UV and ozone,
- MO fire certification,
- class C airtight performance as per standard NF EN 12237.
