

**Connector****11098521****CRE + seal - Ø 200 mm - 1/160**

The CRE sealed storey manifold is used to connect up to three 125 mm diameter ducts to the vertical riser while delivering class C airtight performance.

Storey collector connection with seals (CRE)

**PRODUCT BENEFITS**

- easy and quick to install,
- class C airtight performance,
- aesthetic ducting.

**Product description**

The CRE sealed storey manifold is used to connect up to three 125 mm diameter ducts to the vertical riser. It ensures leak-free installation without excessive pressure losses on the branch connection, as well as an airtight seal on the branch / flexible duct connection. The CRE sealed storey manifold is used with storey elements (2.47 m).

**Fields of application**

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

**Installation**

- to slot in or remove an accessory, rotate it slightly in the duct,
- as an airtight seal is automatically provided by the ALDES seal, no need to use sealant or adhesive tape,
- for vertical installations especially, the use of self-tapping screws remains recommended,
- time savings in relation to ducting with standard accessories is in the range of 20 % (at least 15 to 30 seconds saved per junction for diameters 125 to 315, or at least 30 to 60 seconds saved for each accessory in these diameters),
- ALDES sealed accessories are specially designed to ensure easy connection / disconnection. The ALDES range offers class C airtight performance and low connection torque.

**Reference arguments**

Application:

- Joins one connector diameter 160 mm to a vertical riser diameter 200 mm for T.Flow Hygro+ system
- Ensures leak-free installation without excessive pressure loss at connections
- Ensures an airtight connection between duct connector and hose
- Complements storey elements (2.47 m)

Description:

- Sealed storey manifold diameter 200 mm with 1 sealed connector diameter 160 mm galvanised steel

**Main characteristics**

- available in diameters from 125 to 400,
- galvanised steel as per EN 10346 ensuring uniformity of coating,
- 1 x Ø 160 connection version available for T.Flow® Hygro+ system,
- temperature range: - 30°C à + 100°C,
- resistant to ageing (• 30 years), UV and ozone,
- M0 fire certification,
- class C airtight performance as per standard NF EN 12237.
