DAMPER B700 150X150

Product description

The rectangular steel damper B700 balances airflow from square ceiling diffusers SF 704, AF 704 and AN 704. The special design of its vanes enables optimum closure by covering.

Fields of application

New, Refurbishment, Non-residential buildings

Installation

- adjusted via diffuser front face using concealed lever between frame and core,
- clip attachment to diffuser.

Reference arguments

- External frame and core made of assembled extruded aluminium profiles or formed steel plate.
- Spring system enabling removable core for access to interior.
- AF 704: anodised aluminium with natural satin finish or RAL 9010 white epoxy paint.
- SF 704: RAL 9010 white epoxy paint finish.
- Concealed attachment to plenum via screws in neck.
- Plenum fitted with brackets for attachment to concrete slab.

Main characteristics

- steel counter-rotary damper.
