PRODUCT BENEFITS

- easy to install,
- high acoustic performance,
- concealed screw attachment.

REGLEMENTATIONS AND COMPLIANCES

Identification no. QB37 : 05/02-CHY1-2267; 05/02-CHY1-2266; 05/02-CHY2-2185
 Technical Opinion no. : 14.5/17-2266; 14.5/17-2267; 14.5/17-2185

Principles of operation

EHT² is a humidity-controlled air inlet for wall penetration on individual houses and multi-occupancy residential buildings.

Product description

EHT² is an acoustic humidity-controlled air inlet for wall penetrations. EHT delivers fresh air and distributes incoming airflow around the dwelling according to the humidity level.

Fields of application

Multi-occupancy residential housing, Individual residential housing, New, Refurbishment

Installation

- the air inlets must only be installed in the main rooms of the dwelling: bedrooms, living room, lounge, etc.
- EHT² must be installed in a wall penetration,
- connection to Bath/shower PVC pipe 100 mm or 125 mm diameter,
- acoustic foam inserted directly into the PVC opening.

Main characteristics

- acoustic air inlet,
- ideal for through-wall installation,
- range of EHT² accessories for improved acoustic performance.

Supplementary characteristics

This product is also available as a fixed air inlet under the name EFT².
