EasyVEC Compact 300 insulated filter box

Product description

This filter box contains filters to purify the air supplied throughout the building.

Fields of application

New, Refurbishment, Non-residential buildings

Installation

- for airflows below 3000 m³/h, attachment to fan unit.

Reference arguments

- Accessories for changing the configuration of EasyVEC® non-compact units: connections, grilles and plugs (galvanised steel).
- Accessories for the installation of compact models: suspension straps and attachment kit.
- Filtration accessories: filter cartridges with 25 mm double skin insulation and two filter rails, G4 / F7 filters and clogged filter kit.

Main characteristics

- easy to attach to the box fan with a good airtight seal,
- supplied without filter, ordered separately.
