#### Air handling unit

## 11090246

## Evaporator coil +/- DFE+ 2000 + BAC

Coil built into unit to provide additional heating or cooling to a high-efficiency heat recovery unit.

### PRODUCT BENEFITS

• supplies heating/cooling properties and secures the temperature of the supplied air, for optimal comfort.

### **Principles of operation**

Coil built into unit to provide additional heating or cooling to a high-efficiency heat recovery unit.

#### **Product description**

Coils inside units to provide additional heating or cooling to a high-efficiency heat recovery unit. Coils enable you to control the temperature of the air supplied to the space.

#### **Fields of application**

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

#### Installation

- indoors or outdoors,
- the «SAT BA» kit is required to control the coil from the TAC 4 controller on DFE units.

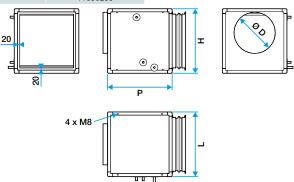

#### **Main characteristics**

- 18 models of water coils (heating/cooling) in boxes equipped with stainless steel condensate collection trays (cold water coils only),
- 6 models with direct control 4 DX rows (evaporation/condensation) in boxes equipped with stainless steel condensate collection trays,
- double-skin galvanised steel insulation 30 mm,

Motorised 3-way valve kit, SAT BA and temperature sensors must be ordered as accessories.
