

Connector

11097051 GALVA CIRC RA - D500/800

The PEC circular 90° branch connector makes a right-angle branch on a galvanised circular duct.

Piquage Equerre Circulaire 90°

Product description

The PEC circular 90° branch connector makes a right-angle branch on a galvanised circular duct. The PEC circular 90° branch connector is for use on horizontal branches specific to commercial systems. It is not recommended for use on residential type risers (use factory-fitted CRE storey elements).

Fields of application

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

Installation

- when installing, pay special attention to pressures losses, noise and leaks that may be generated,
- easy assembly of interlocking accessories: ducts are female, accessories are male,
- final seal requires sealant and/or perforated strip,
- attached to duct using self-tapping screws (4 to 6 depending on diameter).

Reference arguments

Application:

- Serves to add a 90° bend diameter 800 mm to circular ducting diameter 500 mm.

Description:

- Galvanised steel connector diameter 500/800 mm

Main characteristics

- available in diameters from 80 to 900,
- galvanised steel as per EN 10346 ensuring uniformity of coating,
- MO fire certification.
