

11015005

Interface 230 VAC/ 3 V DC

Reference arguments

Application :

- 230 V power card for humidity-controlled terminals.

Description :

- This interface allows connection of an Aldes terminal of type BDH,
- Like a battery, it inserts into the terminal and simply clips onto its battery terminal block. The terminal, thus equipped, connects directly to the 230 VAC mains,
- A simple press on the push button triggers the 30-minute timed boost airflow.
