M0 outlet sleeve + EasyVEC® connector Ø 250 mm

### Product description

This kit is used to separate the fan unit from the extract system (as per requirements of DTU 68.3), to prevent the transmission of vibrations. It is used to duct the unit outlet using a connector compatible with the EasyVEC range, a flexible sleeve and clamp collars. Select a kit according to the fan unit.

### Fields of application

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

### Installation

- for installation between the extraction unit and the rigid galvanised ducting.

### Reference arguments

Application:

- Flexible connection sleeve for discharge on EasyVEC® ventilation unit
- Serves to separate the unit from the exhaust ductwork and avoid the transmission of vibrations

Description:

- Flexible sleeve made of M0 material
- 2 Serflex type clamp collars
- galvanised steel connection for EasyVEC® unit Ø250

### Main characteristics

- deformable fabric in material certified A2-s1, d0,
- galvanised steel serrated clamp collars.

### Contents of kits

Connector compatible with EasyVEC®, flexible sleeve and two clamp collars.
