# 11098416 <br> PEC GALVA Branch piece+seal - $\emptyset$ 200/355-400 mm 

## The PEC sealed circular $90^{\circ}$ branch connector makes a right-angle branch on a galvanised circular duct.

Sealed circular 90 branch connector

## PRODUCT BENEFITS

- easy and quick to install,
- aesthetic ducting.

## Product description

The PEC sealed circular $90^{\circ}$ branch connector makes a right-angle branch on a galvanised circular duct. The PEC sealed circular $90^{\circ}$ branch connector is for use on horizontal branches specific to commercial systems. It is not recommended for use on residential type risers (use factory-fitted CRE storey elements).

## Fields of application

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings
Installation

- when installing, pay special attention to pressures losses, noise and leaks that may be generated
- prioritise the use of factory-produced sealed T-pieces,
- to slot in or remove an accessory, rotate it slightly in the duct,
- as an airtight junction is automatically provided by the ALDES seal, no need to use sealant or adhesive tape,
- for vertical installations especially, the use of self-tapping screws remains recommended,
- time savings in relation to ducting with standard accessories is in the range of $20 \%$ (at least 15 to 30 seconds saved per junction for diameters 125 to 315 , or at least 30 to 60 seconds saved for each accessory in these diameters),
- ALDES sealed accessories are specially designed to ensure easy connection / disconnection. The ALDES range offers class C airtight performance and low connection torque.

## Reference arguments

## Application:

- Adds a $90^{\circ}$ sealed bend diameter 355 to 400 mm to circular ducting diameter 200 mm .

## Description:

- Sealed connector galvanised steel diameter 200/355-400 mm

## Main characteristics

- available in diameters from 125 to 315,
- galvanised steel as per EN 10346 ensuring uniformity of coating,
- all junctions are crimped,
- temperature range: - $30^{\circ} \mathrm{C}$ à $+100^{\circ} \mathrm{C}$,
- resistant to ageing ( -30 years), UV and ozone,
- MO fire certification,
- not advised for class C airtight performance.
