ROCTP GALVA - 410x165 - D250

The ROCTP oblong cylindrical tangent reducer is used to connect an oblong duct with a circular duct while maintaining a linear and flat ducting without losing space underneath.

Oblong Tangent Cylindrical Reducer on flat section:

PRODUCT BENEFITS

- small size for high airflow,
- good airtight performance and controlled pressure losses,
- easy to install and maintain (no inaccessible corners).

Product description

The ROCTP oblong cylindrical tangent reducer is used to connect an oblong duct with a circular duct while maintaining a linear and flat ducting without losing space underneath.

Fields of application

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

Installation

- easy assembly of interlocking accessories: ducts are female, accessories are male,
- Final seal requires sealant and/or perforated strip,
- attached to duct using self-tapping screws (4 to 6 depending on diameter).

Reference arguments

Application:

- Oblong accessories for installation of ventilation systems in confined spaces (suspended ceiling, horizontal side flues conveying high airflow, etc.)
- Cylindrical tangential oblong reducer used to connect oblong ducting to circular ducting while retaining a linear, flat system without losing space underneath

Description:

- ROCTP cylindrical tangential oblong reducer on flat section, galvanised steel
- Length 410 mm and height 165 mm - Diameter 250 mm

Main characteristics

- standard dimensions (20 oblong sections),
- galvanised steel as per EN 10346 ensuring uniformity of coating,
- M0 fire certification.
