

**Airflow control****11064286****ROTP GALVA - 620x320 / 645x265**

The ROTP oblong tangent reducer is used to connect oblong ducts of different diameters while maintaining a linear and flat ducting without losing space underneath.

**PRODUCT BENEFITS**

- small size for high airflow,
- good airtight performance and controlled pressure losses,
- easy to install and maintain (no inaccessible corners).

**Product description**

The ROCTP oblong tangent reducer on flat section is used to connect two oblong ducts of different diameters while maintaining a linear and flat ducting without losing space underneath.

**Fields of application**

Multi-occupancy residential housing, New, Refurbishment, Non-residential buildings

**Installation**

- easy assembly of interlocking accessories: ducts are female, accessories are male,
- Final seal requires sealant and/or perforated strip,
- attached to duct using self-tapping screws (4 to 6 depending on diameter).

**Reference arguments**

Application:

- Oblong accessories for installation of ventilation systems in confined spaces (suspended ceiling, horizontal side flues conveying high airflow, etc.)
- Tangential oblong-oblong reducer used to connect oblong ducting to oblong ducting of a different size while retaining a linear, flat system without losing space underneath
- If no reduction on height, use an RCO.

Description:

- ROTP tangential oblong reducer on flat section, galvanised steel
- Length 620 mm x height 320 mm - Length 645 mm x height 265 mm

**Main characteristics**

- standard dimensions (20 oblong sections),
- galvanised steel as per EN 10346 ensuring uniformity of coating,
- MO fire certification.

**General data**

Variants	Main material
11064286	Galvanised steel
