

Heat and smoke exhaust box fan accessory

11039182

Rectangular flexible sleeve for air outlet T2 ProtectONE® R

Product description

The rectangular flexible sleeves are used to connect the ProtectONE® R unit to smoke and heat exhaust ducting (air inlet or outlet). Their flexibility attenuates fan vibrations and makes the connection to the unit easier.

Fields of application

New, Refurbishment, Non-residential buildings

Installation

- sleeve attached with sheet screws on the ProtectONE® R unit connection.

Main characteristics

- non-flammable flexible sleeve,
- 3 sizes available.
