Replacement G2 filter for TWISTED® (pack of 5) D200

**Product description**

Pack of 5 filters which capture airborne particles to prevent them from clogging the fan connected to the TWISTED® plenum.

**Fields of application**

New, Refurbishment, Non-residential buildings

**Installation**

- directly installed in the TWISTED® plenum.

**Reference arguments**

Design

- High induction air diffusion by rotation of air jet inside the plenum. By maintaining a sufficient discharge speed, the diffusion cone ensures a perfect Coanda effect (ceiling effect) and a helical air jet. This swirl air jet will cause the ambient air to move, thereby mixing it with the air supply to ensure homogeneous temperatures in occupied areas.

**Main characteristics**

- G2 elliptical flat filter,
- pack of 5,
- M1 fire certification,
- for TWISTED® diffuser.
