

Axial heat and smoke exhaust fan

11055049
TF MOTOR 230 ON/OFF

Product description

These proportional or on/off motors, with or without spring return, 1 or more contacts, are used to drive circular and rectangular dampers as well as the MR Max motorised airflow regulator

Fields of application

New, Refurbishment, Non-residential buildings

Installation

- fitted directly to the damper plate using the clamp collar,
- proportional motor: adjustable motor travel using stops.

Reference arguments

• Belimo servomotor TF 230 On/Off with return spring. • Torque: 2.5 Nm. • Voltage: AC 230 V. • Travel time: 75 sec / 90°. • Protection rating: IP42. • Connection using 1 m PVC cable. • Rotation direction: selectable. • To drive RGE dampers Ø125 to Ø200 mm.

Main characteristics

- proportional or on/off,
- with or without spring return,
- information reporting: 1 or more contacts,
- 24 or 230V,
- torque 2 to 20 N.m,
- IP54.
