

Air handling unit

11058419

VEX330C-2

The VEX 300 C ceiling units are very compact and quiet, ideal for installation in suspended ceilings.

PRODUCT BENEFITS

- for suspended ceiling installation,
- very compact with high output,
- ultra quiet.

REGLEMENTATIONS AND COMPLIANCES

Eurovent Certification no. : 10.12.505

Principles of operation

The VEX 300 C brings fresh, filtered air into the building and recovers heat from exhaust air using its high-efficiency heat exchanger. The incoming air can be heated and/or cooled using a comprehensive range of coils.

Product description

VEX 300 C ceiling units are very compact, making them ideal for installation above suspended ceilings, etc. Two-door variations allow for either vertical or horizontal opening, ideal for servicing requirements with different types of suspended ceilings and where there is limited space available. The optimised design delivers ultra-low sound levels. VEX 300 C is available as a LEFT or RIGHT version - with two motor sizes.

Fields of application

New, Refurbishment, Non-residential buildings

Installation

- indoor (false-ceiling),
- circular spigots,
- right or left access.

Air handling unit

11058419
VEX330C-2

Main characteristics

- 4 VEX300C models up to 1 490 m³/h,
- monobloc units,
- freestanding construction with double skinned panels,
- external finish: Aluzinc AZ185: corrosion class C4,
- 49 mm mineral wool insulation, density 65kg/m³,
- EN1886 values: D2, L2/L2, T2, TB3, F8,
- EC motor with high performance backward curved impeller,
- easy access & maintenance: sliding or hinge-mounted doors,
- choice of positioning of controls,
- highly efficient heat recovery heat exchanger (Eurovent AAHE),
- modulated Bypass,
- choice of filters for guaranteed air quality: flat ISO ePM10 50% (M5) or ISO ePM160% (F7) filters (ask us about other types of filter/pre-filter),
- Integrated switch,
- EXact2 controls:
 - constant speed,
 - multi-speed,
 - constant pressure,
 - 0-10V.
- configuration and monitoring via:
 - wired remote control,
 - option: Webserver and BMS communications via Modbus RTU / RS485, BACnet MSTP / BACnet IP protocols,
 - option: Webserver and BMS communications via a bridge to Modbus TCP/IP or LON protocols.
